

Android Tutorials

- This site features a list of various Android tutorials.
- The complete source code for the tutorial can be downloaded by clicking on the download link 
- All available tutorials are listed in the navigation bar to the left.
- Click on a specific tutorial to see further details.
- For each tutorial, there are a number of slides that explain some basics for the respective tutorial as well as the documented source code.
- Switch between the slides and the source code view using the tabs on the top.
- The first slide for each tutorial shows the directory path to the source code in the top right corner.
- Use Android Studio to open a tutorial via File > Open...> Select root directory.
- Fork on Github: <https://github.com/apuder/android-tutorials>

Note: unfortunately the PDF viewer used for this site does not support hyperlinks (yet). Download the PDF via the download link in the top-right corner and use a desktop PDF viewer to open hyperlinks.
