

Android - Notification

- A notification is a message you can display to the user outside of your application's UI.
- There are two areas to view notifications: Notification area and notification drawer. Both of these areas are system controlled.
- Notifications will first appear as an icon in the notification area
- Details of the notification can be seen by opening the notification drawer and clicking on a specific notification.
- The following application will trigger a notification after 5 seconds when "Trigger Notification" button is clicked.
- The notification will appear in the notification area on the top of the screen.

Exercise

- The tutorial uses a 'normal view' for the notification. Change the application such that it uses the 'big picture style' showing a bitmap in the notification.
