

Android - NFC Reader

- Used for short-range wireless communication.
 - Typically requires a distance of 4cm or less to start a connection.
- Allows the exchange of small amounts of data between either:
 - an nfc-enabled Android device and a NFC tag
 - Two nfc-enabled Android Devices
- Three modes of Operation:
 - Reader/Writer Mode
 - P2P(Peer-2-Peer) Mode
 - Card emulation mode

Example of a NFC Tag
