

Android - Alerts

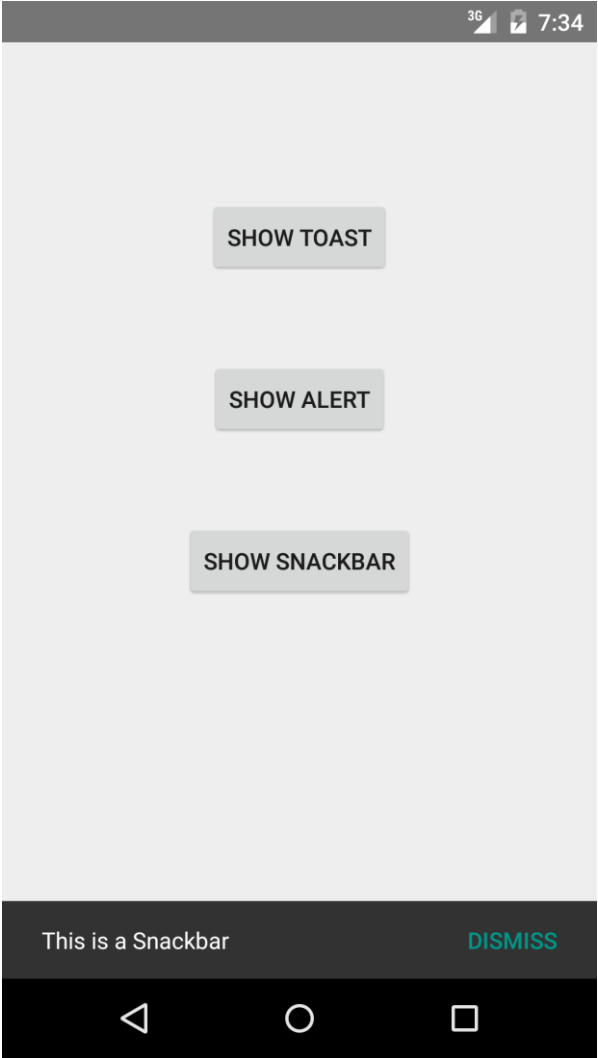

- App shows three different kinds of alerts: AlertDialog, Toast and Snackbar
- AlertDialog:
 - Modal dialog that can have one or more buttons.
 - Users have to explicitly acknowledge by pressing one of the buttons.
- Toast:
 - Short text message that is displayed for a few seconds.
 - Toasts are automatically removed
- Snackbar
 - Short text message that can be displayed for a few seconds or indefinitely.
 - Snackbars are automatically removed unless LENGTH_INDEFINITE is used.
 - If LENGTH_INDEFINITE is used, snackbars must be removed by an Action
 - Unlike Toasts, Snackbars can have Actions

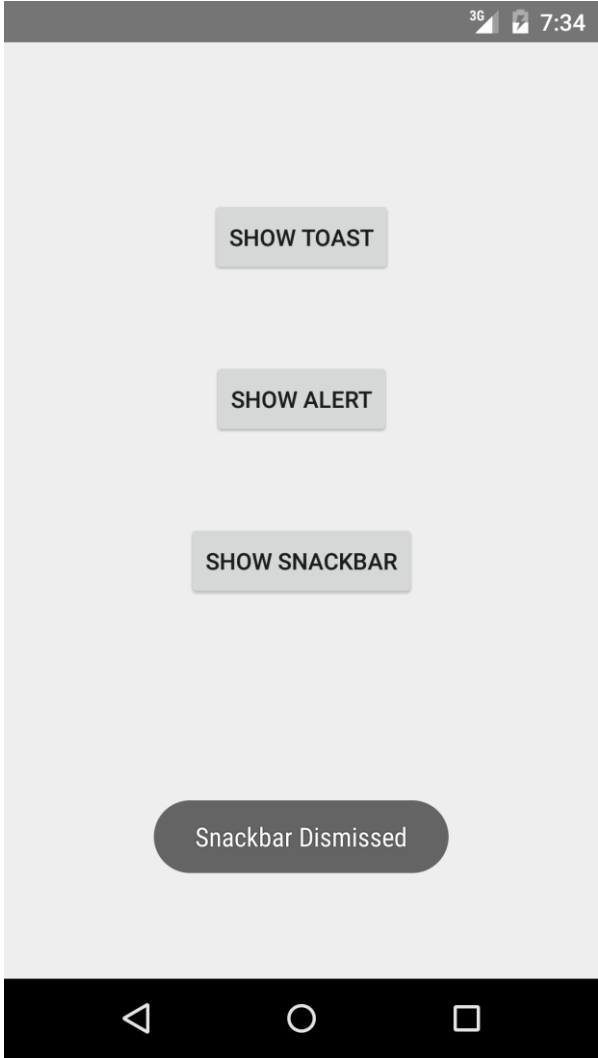

Toast

AlertDialog

Snackbar

Snackbar Dismissed
