# Android - HelloWorld (Portrait)

- Simple "Hello World" similar to declarative version
- Locks the orientation to portrait mode
- Locking orientation is done via XML attribute in `AndroidManifest.xml`
- XML-attribute used is :

  `android:screenOrientation="portrait"`

- "Hello World" is displayed at the center of the screen
- The orientation is locked to portrait mode
- The application can be run by cross-compiling using XMLVM

References

- AndroidManifest file
- <activity> element

Exercise

- Nothing to do!
